## HD HYDRAULIC FLUID ENHANCER

**Eco-Friendly Protection for Hydraulic Systems of All Sizes**

### DESCRIPTION

**WSB HD HYDRAULIC FLUID ENHANCER** is excellent protection for hydraulic systems of all sizes. WSB HD Hydraulic Fluid Enhancer is an eco-friendly formula that reduces temperature in all hydraulic systems and reduces electrolysis by as much as 50 Percent. Can withstand up to 1000 degrees without losing lubrication and protection. Increases fluids' film strength to over 200,000 psi. Protects critical systems parts and spool valves from wear and sticking.

### BENEFITS

- Reduces temperature up to 30 degrees
- Aids in displacing water or moisture content in hydraulic systems
- Reduces electrolysis by as much as 50 percent
- Withstands up to 1000 degrees without losing lubrication and protection
- Increases fluids' film strength to over 200,000 psi, protecting critical system parts and spool valves from wear and sticking

### APPLICATIONS

Transportation • Agriculture • Construction • Marine • Industrial/Manufacturing

### TECHNICAL

#### Mix Ratio

- Use at 5 percent per volume of current hydraulic fluids
- May be used up to 10 percent in extreme temperature or high pressure systems
- May be added at any time, does not require changing of fluid or mixing and will actually self-mix with all known fluid including synthetics
- May be used in all weight fluids without changing viscosity, even in cold climates
