HEAVY FUEL OIL ENHANCER

Increase Your Burn—Reduce Your Emissions

DESCRIPTION

WSB HEAVY FUEL OIL ENHANCER may be used as a burn catalyst for all heavy fuel oils as well as powdered coal to increase BTUs and reduce emissions. In heavy fuel oils, (HFOE) will prevent clumping of oil molecules to provide a much better combustion, while increasing BTUs of the fuel. (HFOE) will also provide a much lower pour point of heavy fuel oils and reduce emissions by as much as 70 percent. The savings realized by using (HFOE) are considerable – a ratio of up to ten times the savings of cost of product.

BENEFITS

- Prevents clumping of oil molecules
- Increases BTUs
- Lowers pour point
- Reduces emissions
- Significant return on investment

APPLICATIONS

- Furnaces • Boilers • Generators

TECHNICAL

Mix Ratio (recommended)

- Large engines (20 liter or greater) - 1 : 3,000 gallons
- Boilers - 1 : 3,000 gallons
- Small engines (20 liter or smaller) - 1 : 3,000 gallons
